

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listing of claims in the application:

LISTING OF CLAIMS:

Claim 1 (Currently amended) A spinner bait lure box comprised of an enclosure, anchoring spacers, and a top lid, wherein:

~~the~~ said enclosure is a flat rectangular box of one-piece plastic injection-molded construction having longitudinally extended front and rear sides; a pair of longitudinally directed channels are respectively ~~is horizontally~~ disposed along ~~the upper extent~~ said rear side and ~~center~~ a central portion of ~~the~~ said enclosure , each of said channels extends laterally from a longitudinally extending check plate ~~is situated at the lower edges of the said channels~~ disposed in said enclosure, and each of said check plates has a plurality of locating slots ~~are~~ evenly arrayed ~~along the said check plates therein in~~ longitudinally spaced relationship; a plurality of recesses are downwardly contoured laterally across ~~the~~ an inside of ~~the~~ said enclosure, one end of each of said recesses is curved and, furthermore, a locating groove is formed ~~vertically into the~~ laterally in a center of each of said recesses such that it is aligned with a one of said locating slots, a partially arcuate notch is formed at ~~the~~ a posterior end of each of said locating grooves, and a projecting border is

~~present~~ disposed at ~~the two~~ opposing sides of each of said recesses;

each of said anchoring spacers is ~~by design~~ an elongate bar having an upper surface with a wave-shaped contours across the top extent; contour defined by a plurality of wave-shaped peaks and a plurality of troughs respectively disposed between adjacent pairs of said wave-shaped peaks, each of said troughs has a pinch slot is formed along the center of the trough connecting every two wave-shaped peaks centrally therein and, furthermore, each of said pinch slots is aligned with a respective one of said locating slots of ~~the~~ said enclosure and each of said anchoring spacers is seated in a respective one of said channels of ~~the~~ said enclosure;

~~the~~ said top lid is has a rectangular ~~in~~ shape and is fitted onto ~~the~~ an upper edge of the said enclosure ~~to complete the assembly of the spinner bait lure box of the invention herein.~~
